

UNIO Enterprise Acquired by OIQ Global to Redefine Connectivity for Mobility

Munich, Germany – 2 September 2025

Munich-based NewSpace startup **UNIO Enterprise**, founded in 2022, is entering a new chapter as part of **OrbitsIQ Global (OIQ)**. The acquisition combines UNIO's pioneering connectivity software with OIQ's vision to seamlessly integrate satellite and terrestrial networks with mobile assets anywhere in the world. OIQ is building a seamless, ubiquitous bridge across terrestrial cellular and space-based connectivity, delivering uninterrupted services to fixed and mobile assets such as cars, boats, planes and autonomous systems, anywhere on Earth anytime whether in flight, on the water or just on the road. Together, the companies aim to serve millions of connected mobile assets globally.

“Joining OIQ Global marks a turning point for UNIO. With our connectivity expertise and OIQ's constellation vision, we will redefine how mobility assets connect. This partnership allows us to accelerate our roadmap and deliver the next generation of intelligent connectivity across terrestrial and satellite networks for industries such as automotive, agriculture, logistics and maritime sectors,” said **Katrin Bacic, CEO of UNIO Enterprise**.

Joseph J. Euteneuer, CEO of OIQ Global, added: “We are delighted to welcome UNIO Enterprise into the OIQ Global family. Their AI-powered smart-switch connectivity technology is the perfect complement to our global anywhere anytime connectivity vision. Together, we will establish a seamless, multi-band mobility connectivity capability that unlocks new frontiers in efficiency, safety, and operational insight around the world.”

With autonomous driving, smart logistics, and predictive maintenance demanding uninterrupted connectivity, the combined expertise of UNIO and OIQ positions Europe at the forefront of global telematics innovation. At a time when mobility connectivity has become as critical as fuel, this partnership strengthens Europe's leadership in shaping a sovereign, secure digital infrastructure.

The new chapter will be unveiled at **IAA MOBILITY 2025** in Munich from 8–12 September (**Hall B3.D130, Messe München**). CEO Katrin Bacic, CTO Frederic Baker, OIQ Global CEO Joseph J. Euteneuer and OIQ Global COO John Archer will be available for **exclusive interviews** between 8–10 September upon request.

About UNIO Enterprise

UNIO solves the challenge of unreliable connectivity for vehicles and mobile applications by merging terrestrial cellular and satellite networks through its intelligent UNIO Move B2B solution. This enables real-time, uninterrupted digital access and opens new opportunities for connected mobility worldwide.

About OrbitsIQ Global (OIQ)

Founded in 2024, headquartered in Luxembourg with international offices, including in the US, OrbitsIQ Global SA is building a ubiquitous connectivity capability across terrestrial and satellite networks, delivering uninterrupted, secure services to fixed and mobile assets.
